

ASSEMBLY INSTRUCTIONS OVAL POOLS NBS MODEL G

DO NOT DIVE OR JUMP, SHALLOW WATER!

WARNING : THIS POOL IS NOT DESIGNED FOR DIVING AND/OR JUMPING.

WARNING : The pool owner is responsible to ensure everyone who accesses the yard, follows all safety instructions.

WARNING : Be sure you have read and understand the 'Safety Information' sheets before you begin your pool installation.

- Never dive, jump or slide into an above ground swimming pool. Diving, jumping or sliding may result in permanent injury or death.
- The homeowner is responsible to install all safety labels. The safety labels shall be placed above the water line, never covered and always visible from any potential entry points of the pool. Also, make sure to install safety labels at all access points of your yard.
- Adult supervision is always necessary. Never take your eyes off children or swimmers in the water or near the pool.
- Designate an adult pool watcher. Make sure that you or your pool watcher are able to intervene in less than 10 seconds to save a life or avoid injury.
- Do not swim during thunder, electrical or wind storms.
- Keep rescue equipment such as life rings and reaching poles etc, in a prominent area by the pool at all times. Please consult your municipality to get a rescue equipment list.
- An emergency phone number such as: nearest available police, fire, ambulance and/or rescue unit, must be visible from pool area. A functioning fixed or cellular phone must be reachable immediately.
- It is important that all users be able to see the bottom of the pool. Foggy water must be cleared up before entering the pool. At night, sufficient lighting must be available. It's the homeowner's sole responsibility to provide adequate lighting for pool bottom, safety labels and walkways, which exceeds minimum standards of the IES of North America.
- Never swim alone, under the influence of drugs or alcohol, tired or ill.
- All accessories and liners : the homeowner must follow the manufacturer's instructions and safety warnings.
- Do not affix any other products to your pool other than required by your local code.
- Do not sit, climb or stand on the top ledges of the pool.

WARNING : this product contains chemicals which are known to the state of California to cause cancer and/or reproductive harm. p65warnings.ca.gov

SAFETY LABELS

If you require additional labels, you can order more free of charge by calling 1-888-777-0447

SAFETY INFORMATION

WARNING : All pool components, such as the filtration system, pump and heater should not be positioned in such a way that someone could use them to gain access to the pool. Be sure that filter, pump, all toys, chairs, tables, buildings or similar objects are at least at a minimum of 4' (1,22 m) away from the pool. Positioning such objects too close to the pool may allow access to the water while unattended and may cause serious injury or death.

Congratulations! You have purchased a pool of superior quality and durability. To achieve the best possible results, follow the instructions carefully. Failure to follow the installation procedures may result in damage to your pool or property and void your warranty. We recommend that you make a preliminary study of the instruction booklet to familiarize yourself with the different parts of your pool. Make sure that you understand each step thoroughly before you begin assembling. We recommend having your pool installed by a professional. We wish you a most pleasant and refreshing summer.

The homeowner must supervise the installation of the pool in order to make sure that proper installation methods are followed.

The pool is subject to wear and deterioration if not maintained properly and could lead to failure of the pool's structure. Failure of the pool structure might release large quantities of water that will cause property damage, bodily harm or even death.

Before installing your pool, you should check local regulations such as building codes, zoning requirements and electrical codes.

Refrain from finishing up your pool with stones, rocks, gravel, etc., to avoid chipping of the paint and damaging the pool wall. Most decorative rocks are very acidic and they can damage and/or corrode your pool wall beyond repair.

We are not responsible for the installation of the pool. We are not affiliated with any pool installer and assume no responsibility or liability linked to a faulty installation of the pool.

Warning : Do not modify any components of the pool without the written authorization of the manufacturer. Doing so will void the warranty.

If you need any parts, you can order these by calling 1-888-777-0447 or at www.corneliuspools.com

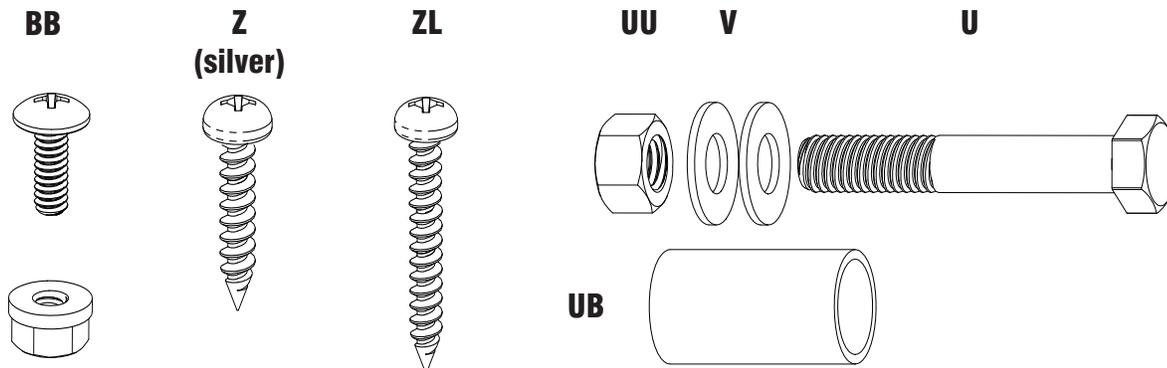

FILTRATION SYSTEM ASSEMBLY

Assemble skimmer, inlet, drain (optional), filter, pump, hoses according to manufacturer's instructions.

PARTS LIST

* SEE DRAWING PARTS NEXT PAGE

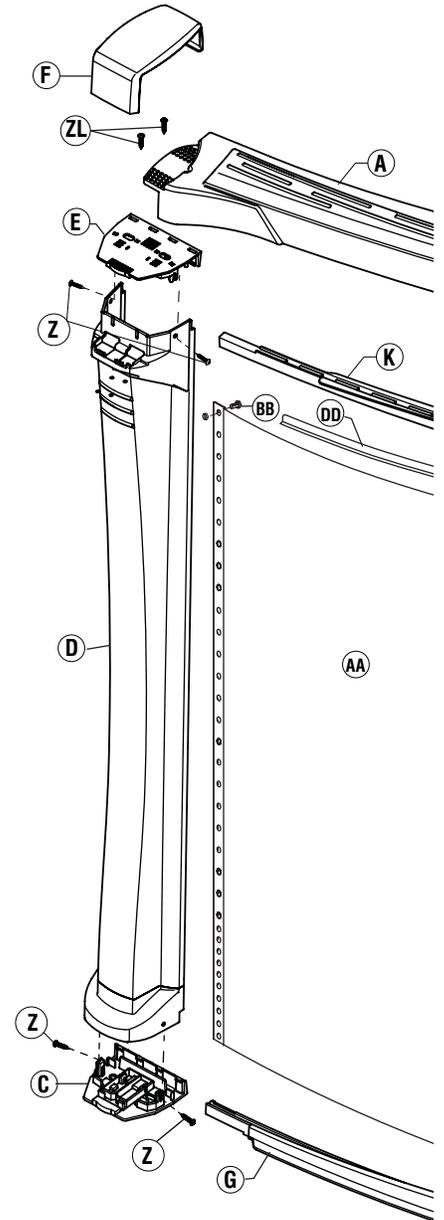

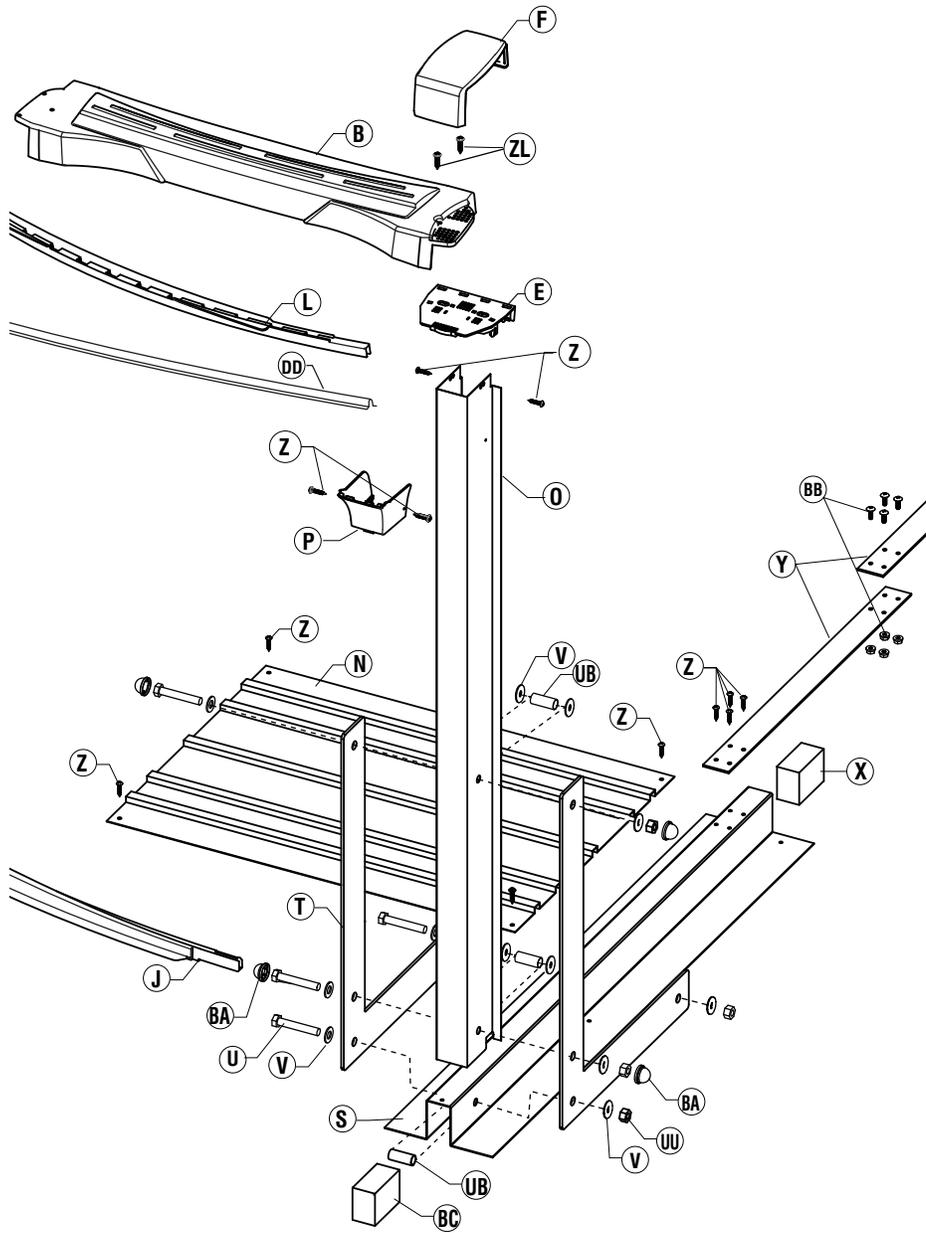

ITEM	DESCRIPTION
AA	POOL WALL
BB	BOLT & NUT FOR WALL & TENSION STRAPS 1/4" X 5/8" (6,35 mm X 15,88 mm)
DD	COPING (OPTIONAL)
A	LEDGE - ROUND SECTION
B	LEDGE - STRAIGHT SECTION
C	BOTTOM CONNECTOR
D	UPRIGHT
E	TOP CONNECTOR
F	TOP CAP
G	BOTTOM TRACK - ROUND SECTION
J	BOTTOM TRACK - STRAIGHT SECTION
K	TOP TRACK - ROUND SECTION
L	TOP TRACK - STRAIGHT SECTION

1

SITE PREPARATION

When selecting a site for your pool, take into account your local regulations regarding fences and utility laws pertaining to electrical cables, as well as the landscaping which you are planning once the pool is installed.

Mark the approximate location of the 4 corners of the pool to confirm pool orientation and available space in your yard. (Refer to Chart 1.1)

Drive a stake into the ground for points A and B using the distance of the straight section according to your pool size referenced in Chart 1.1. It is important that your A and B measurements are exact

to ensure proper installation and avoid problems further on.

Draw two half circles from the A and B stakes using the radius (R) according to Chart 1.1

Join the two half circles with two straight lines parallel to line (AB) at the exact distance (R) from line (AB), refer to chart 1.1

Measure and verify that your total length (E) matches Chart 1.1.

Remove all sod from the area plus an additional 6" (15 cm) around the pool outline. (See illustration 1.1)

Illustration 1.1

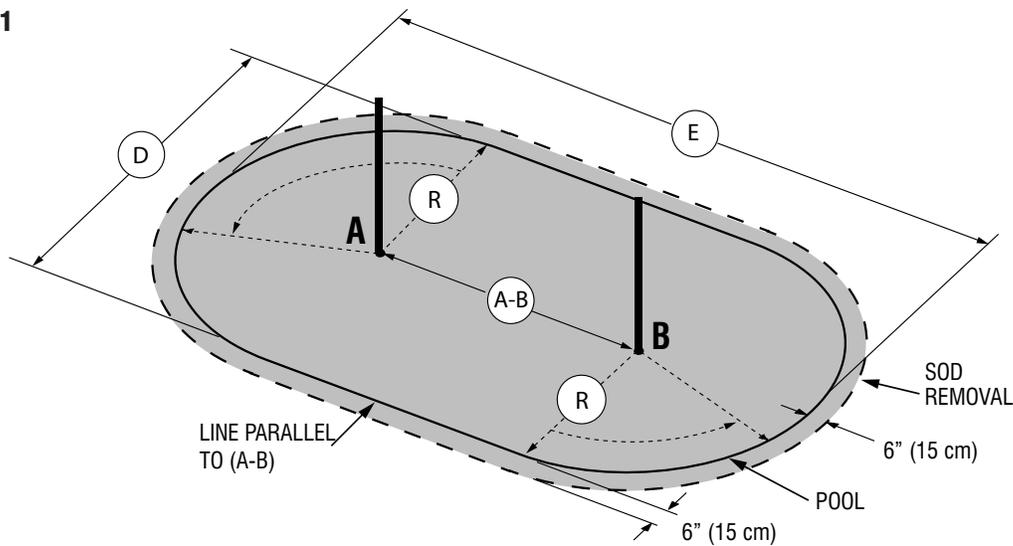

Chart 1.1

SIZE	DISTANCE (A-B)		POOL RADIUS (R)		POOL WIDTH (D)		POOL LENGTH (E)

2

LEVELLING AND TRENCH PREPARATION

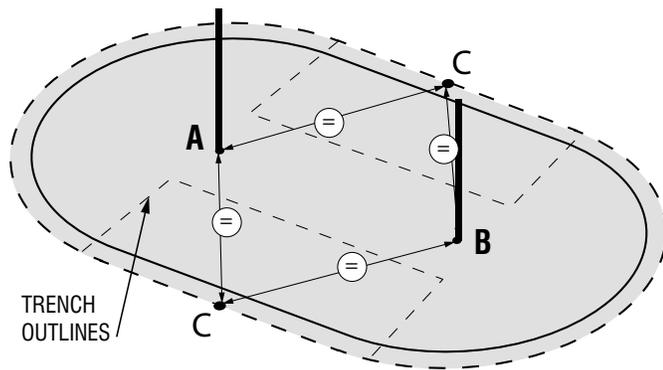

DO NOT ALLOW WATER TO ACCUMULATE AROUND POOL. Make sure to provide good drainage away from the pool.

SITE LEVELLING

The entire area must be perfectly levelled, using a proper levelling tool. Eliminate any protrusions. Ensure that the surface is free of debris such as rocks, wood, nutgrass, weeds and other debris.

Start by finding the center points (C) of both side sections using points A&B. The center point of each side section should be at equal distance from points A&B. Once both center points(C) are located, start locating trenches from these points. (Refer to illustration 2.1)

Illustration 2.1 TRENCHES FOR BUTTRESS ASSEMBLIES

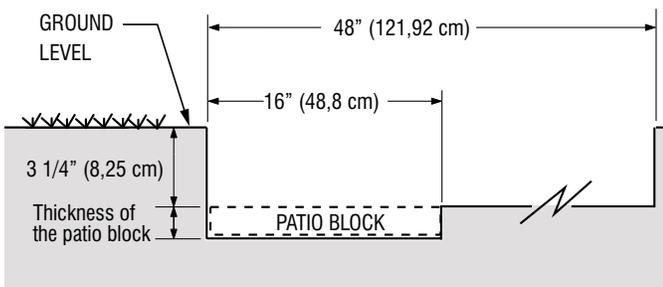

Before digging you must refer to the proper chart and illustration (See next pages)

Dig trenches to a depth equal to the thickness of the patio blocks (a minimum thickness of a 1 3/4" is recommended) and the buttress assembly beam 3 1/4" (8 cm). (Refer to illustrations 2.2)

Make sure trenches are smooth and levelled without compacting

Illustration 2.2

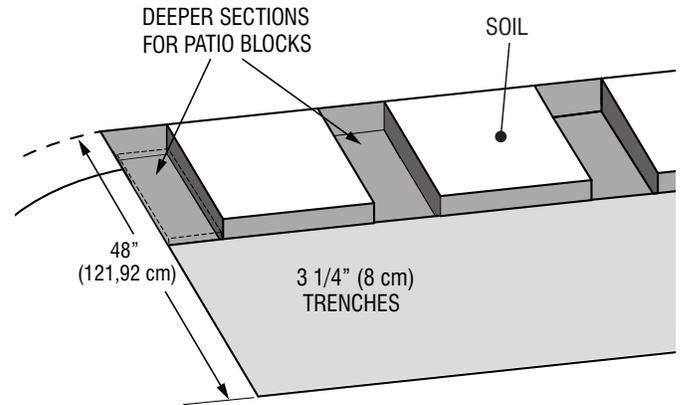

them.

Refer to illustration 2.3 for trench layout detail, all grey shaded areas.

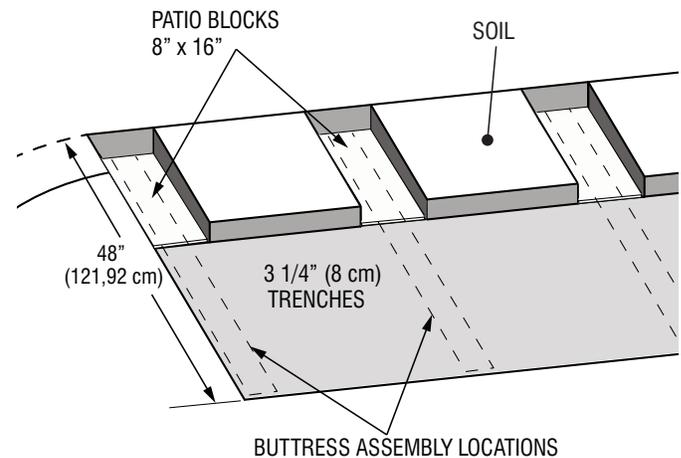

Place and level patio blocks into trenches. Make sure that the top

Illustration 2.3

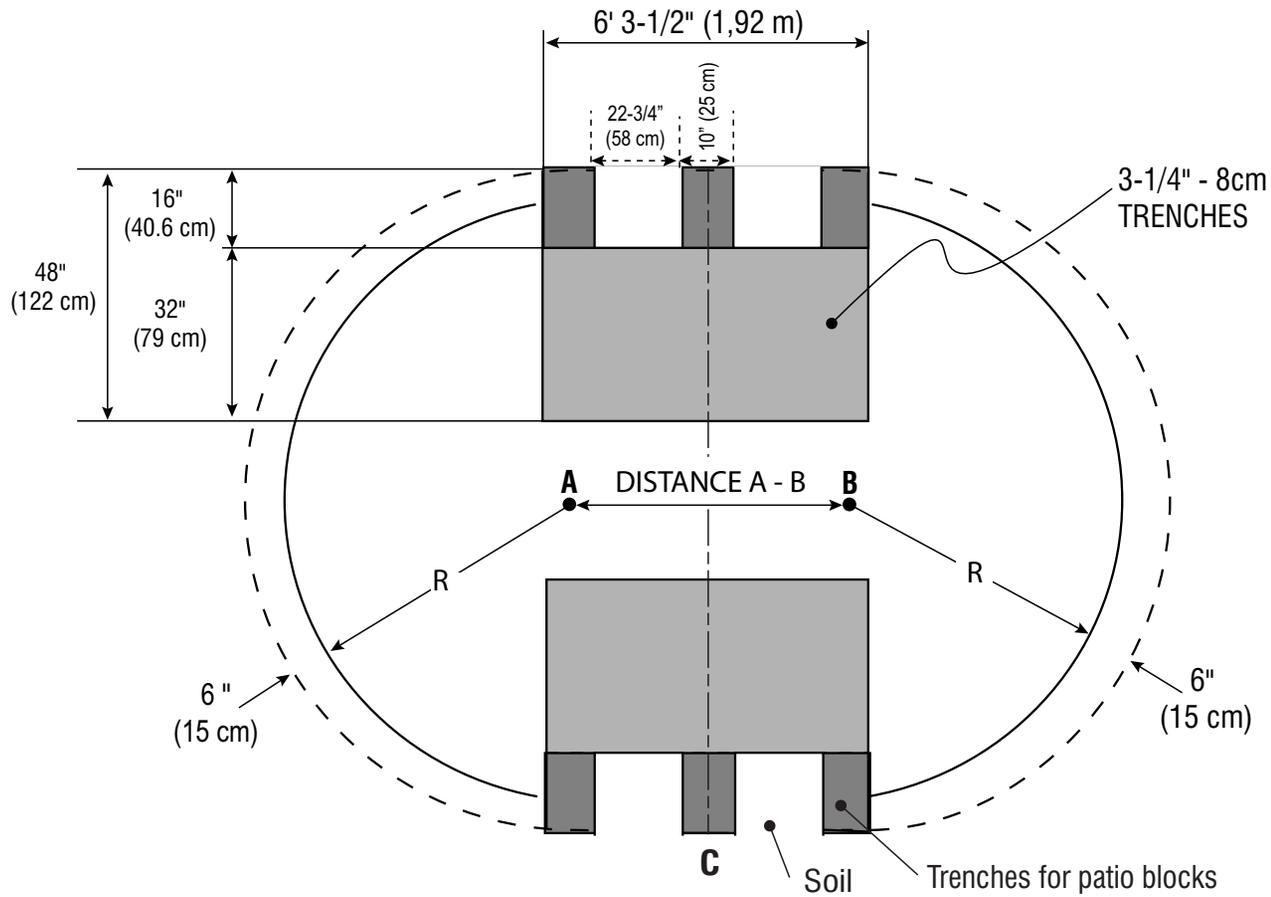

of patio block is 3 1/4" (8 cm) deep in order to accommodate for the buttress assembly thickness. (Refer to illustration 2.4) Top of buttress assembly must be level with the soil.

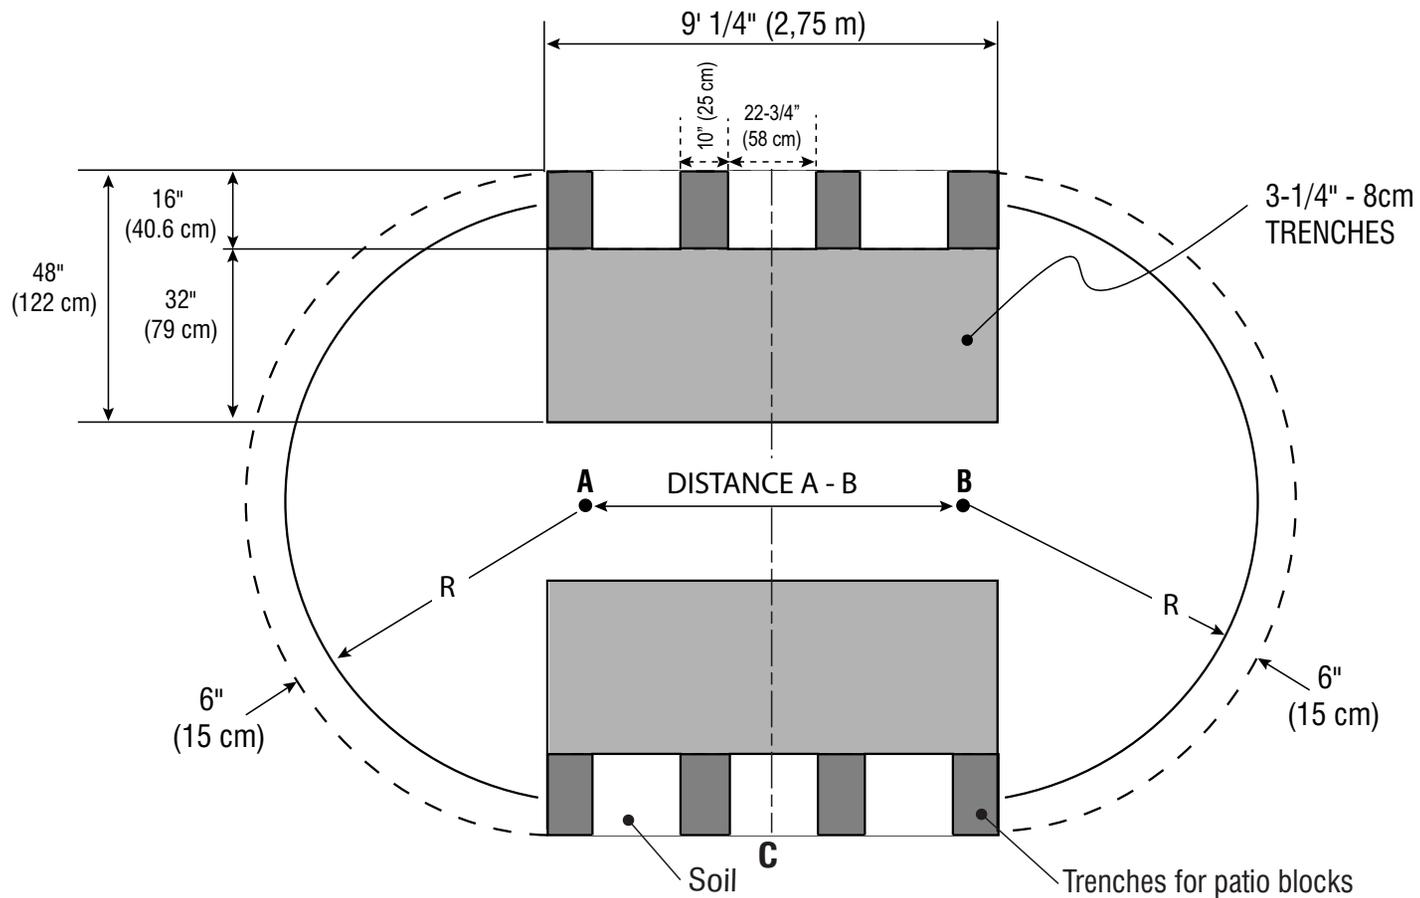

Illustration 2.4

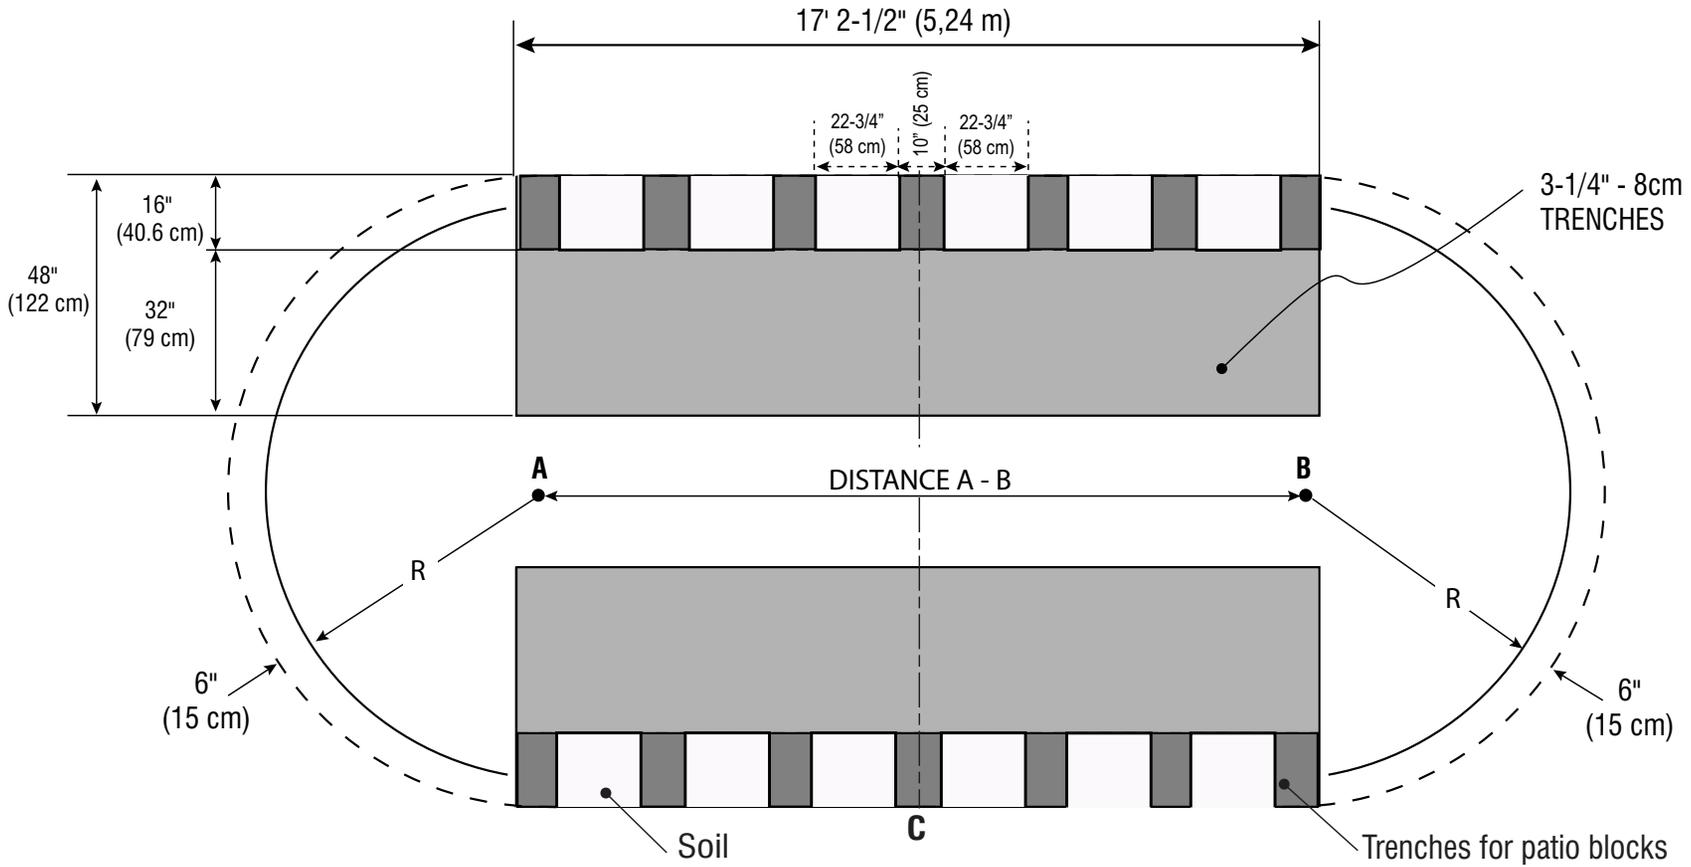

SIZE	DISTANCE (A-B)	POOL RADIUS (R)	POOL WIDTH (D)	POOL LENGTH (E)	PATIO BLOCK	COMPACTION SAND	STONE DUST

3

STRAIGHT SECTION FOOT BEAM ASSEMBLY

Refer to Illustration 3.1. Join splice brackets (T) to the foot beam (S) using bolts 1/2" X 3" (12.7 mm x 76.2 mm) (U), spacers (UB), nuts (UU) and washers (V). Remember to insert both spacers (UB) in the foot beam aligned with the holes, so the bolts go through the spacers when they are inserted.

Illustration 3.1

4

STRAIGHT SECTION BUTTRESS POST ASSEMBLY

Refer to illustration 4.1. Assemble the buttress post using bolts 1/2" X 3" (12,7 mm X 76,2 mm) (U), nuts (UU), washers (V) and spacers (UB). Remember to insert both spacers (UB) between the splice bracket in the buttress aligned with the holes so the bolts go through the spacers when they are inserted.

Refer to Illustration 4.2. Cover the bolt heads with bolt cap covers (BA) and insert the styrofoam blocks (BC) at both ends of foot beam.

Illustration 4.1

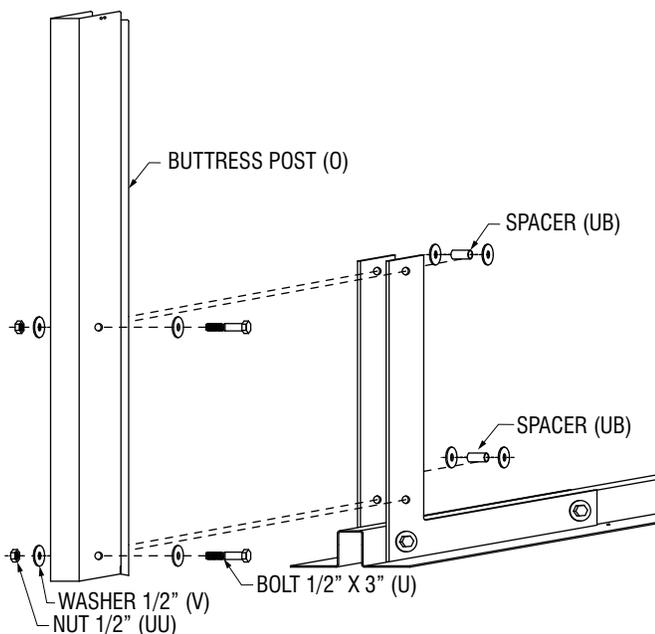

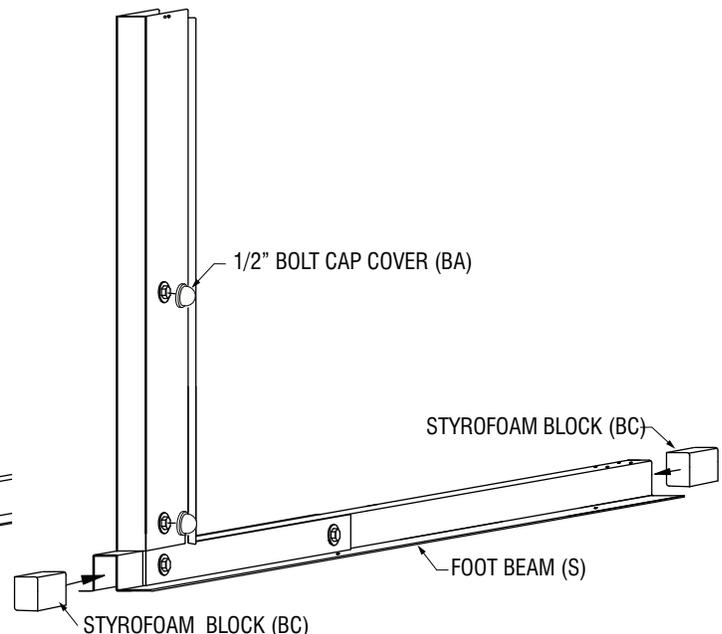

Illustration 4.2

5

BOTTOM TRACK (straight section) AND PRESSURE PLATE

Position the buttress post assemblies in the center of the patio block in the previously dug trenches.

Refer to Illustration 5.2 : Attach pressure plates in between the foot beams with 4 standard screw "Z" (silver).

Refer to Illustration 5.1 : Once the buttress post assemblies are placed in the trenches, install the straight section bottom tracks.

Illustration 5.1

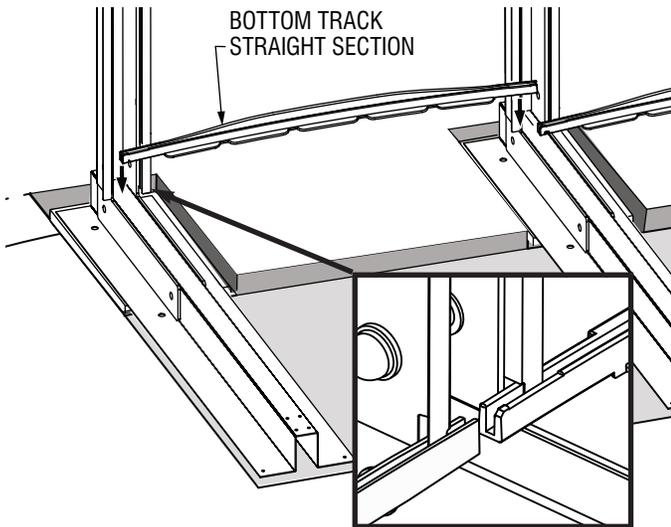

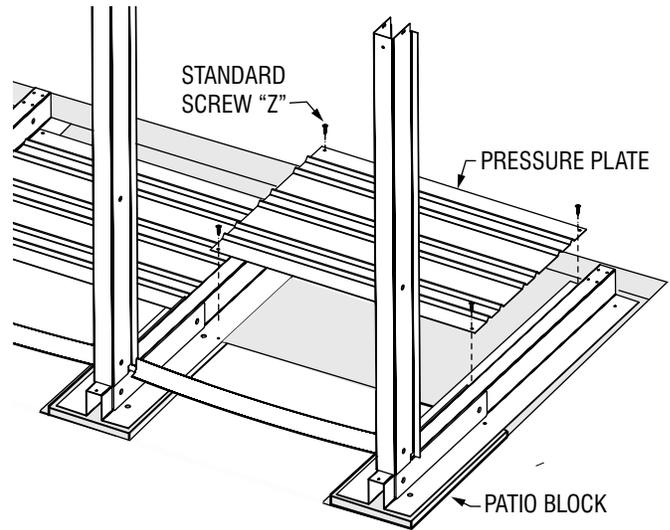

Illustration 5.2

6

TENSION STRAP INSTALLATION

WARNING :
Never use an impact gun for wall and tension straps screws.
Minimum torque force of 60 inch pounds to maximum of 85 inch pounds.

Refer to illustration 6.1 and chart 1.3 carefully. You are now ready to assemble the tension strap rows according to your respective pool size.

Refer to Illustration 6.1 : If there is more than one steel tension strap per row, assemble each joint of the straps together using 4 bolts and nuts (BB) 1/4" X 5/8" (6,35 mm X 15,88 mm), making sure the bolt heads are on top.

Attach the assembled tension straps to the foot beams on both sides of the pool using 4 standard screws "Z" (silver).

Illustration 6.1

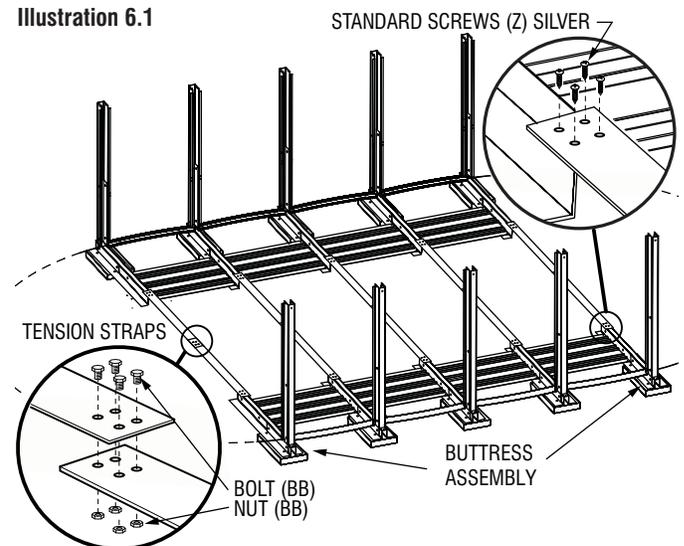

Chart 1.3

POOL SIZES	7x13	7x15	8x14	8x16	8x19	10x16	10x18	10x21	12x18	12x21	12x24	12x27	13x17	13x23	14x20	14x25	15x20	15x23	15x26	15x31	16x26	16x32	18x33	18x38	18x44

7

ROUND SECTION BOTTOM TRACK INSTALLATION

Refer to illustration 7.1. Starting with round section : Place the end of the first round section bottom track on the foot beam so it is inserted into the outside notch of the last buttress post of each straight section. Place the first bottom connector of the round section, at the other end of the bottom track.

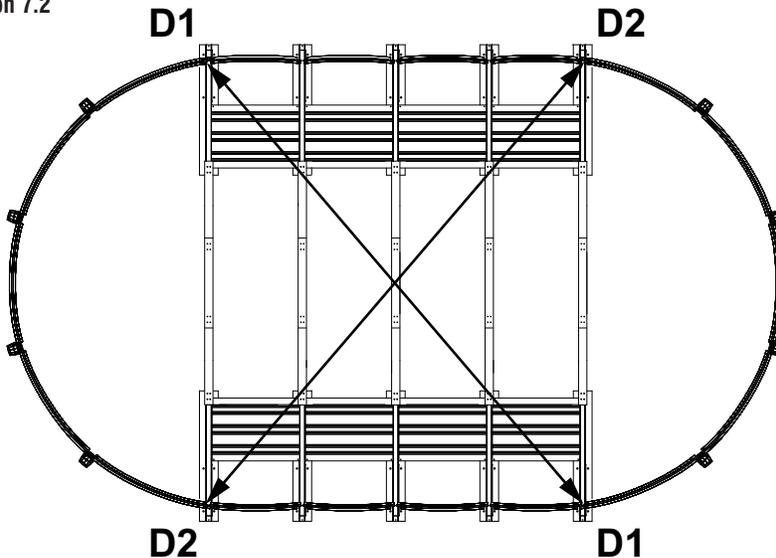

Repeat this procedure until the both half circles are completed.

Illustration 7.1

Important : Before going to the next step, make sure that the centre of the pool is properly squared and the tension straps are straight with no buckles. Refer to illustration 7.2.

Illustration 7.2

The two measurements, D1 and D2, should be exactly the same. If they are not, adjust one entire straight side as necessary.

This is a very important step, do not continue until measurements are identical.

8

WALL INSTALLATION

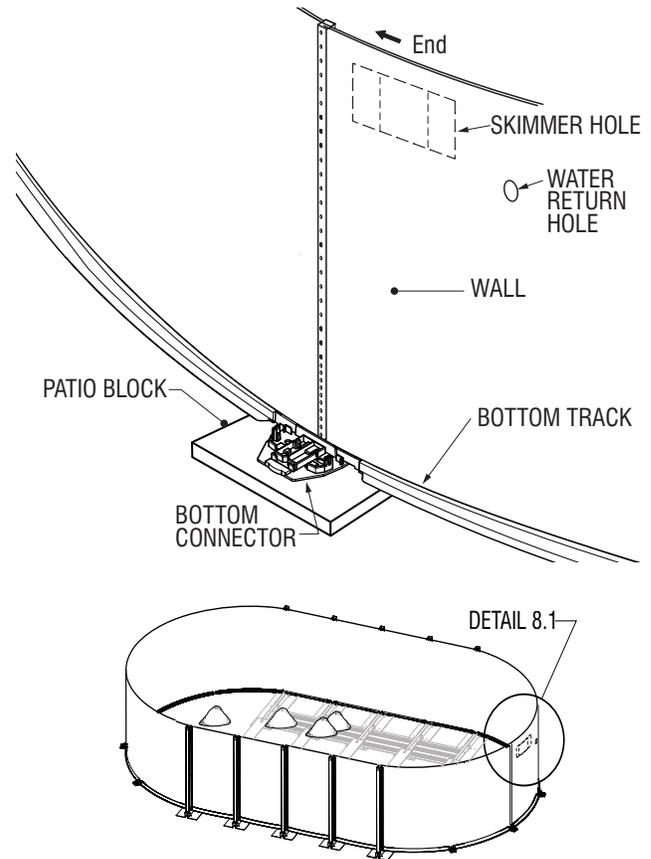

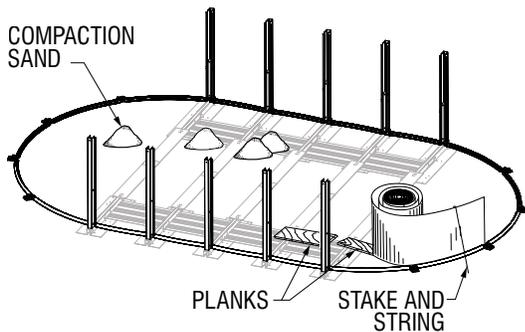

WARNING :

Never use an impact gun for wall and tension straps screws. Minimum torque force of 60 inch pounds to maximum of 85 inch pounds.

When installing the steel wall, it is important to do so in a location protected from the wind or on a day without any wind.

Before uncoiling the wall, add sand for the pool bottom and cove. Choose the filter location beside a round section (never in a straight section). The starting point should be at that location of the skimmer and water return holes and be sure it is at least a minimum of 4' (1.2 m) away from the pool. Make sure the pre-punched holes for the skimmer and water return are at the top and facing the planned location of your filter.

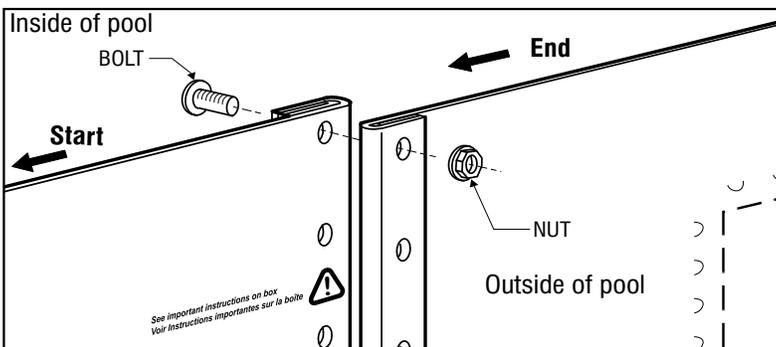

Begin inserting the wall into the bottom tracks in the middle of a bottom connector. At first, the wall is kept in place with one or two stakes and strings (or extra people). One person uncoils the wall on two beams or planks, while a second person inserts it in the bottom tracks. Do not uncoil more than 10' (3 m) of wall before you install a support bar or stake and string to hold the wall in place. Also in the straight section, temporarily secure the wall with transparent tape to the buttress posts.

as per chart 1.4 (next page), adjust tracks and bottom connectors and if applicable, uncoil the wall again. If the spread is too wide, measure the wall and check it against the chart of actual wall lengths below. Join both ends of the wall by orienting folds outward to hide the exclamation icon per illustration below.

Note : *If the wall joint is positioned properly, you should no longer see the exclamation icon. If you can see the icon, you must reverse the overlap.*

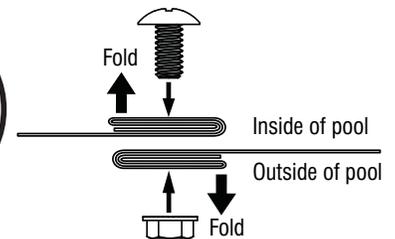

Once the wall is completely uncoiled, you may find that it is too long or that both ends do not meet perfectly. If such is the case, adjust the tracks and bottom connectors until wall holes line up. If this does not work, roll up the wall again, check measurements

Insert bolts and nuts (BB) in every hole and tighten with wrench (screw head on water side of wall). Tape over screw heads with 3 layers of duck tape. **You must use the wall bolts and nuts supplied in the wall box.**

WARNING : Never use an impact gun for wall and tension straps screws. Minimum torque force of 60 inch pounds to maximum of 85 inch pounds.

TOP VIEW

IMPORTANT! *A non-compliant installation according to manufacturers' instruction will void the warranty. A faulty installation will cause the wall joint to split open which could result in serious and/or fatal injuries!*

8

WALL INSTALLATION (CONTINUED)

Chart 1.4

Chart of actual wall lengths

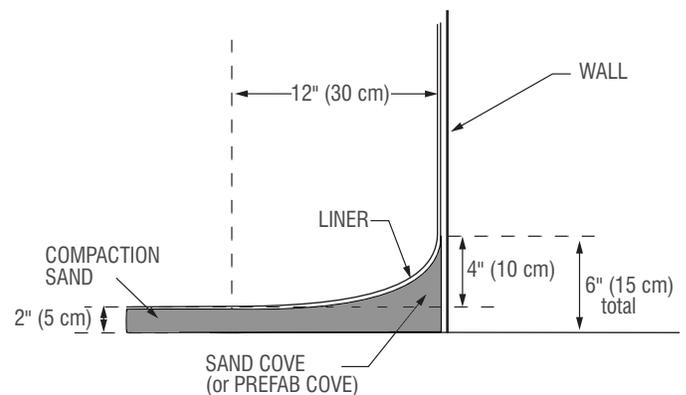

7x13 33' 0" (10.06 m)	7x15 38' 6" (11.73 m)	8x14 36' 5" (11.10 m)	8x16 41' 11" (12.78 m)	8x19 47' 5" (14.45 m)	10x16 42' 5" (12.92 m)	10x18 47' 11" (14.60 m)	10x21 53' 5" (16.25 m)	12x18 50' 7" (15.42 m)	12x21 56' 1" (17.09 m)	12x24 61' 7" (18.77 m)	12x27 67' 1" (20.45 m)	13x17 48' 11" (14.91 m)
13x23 59' 10" (18.24 m)	14x20 55' 3" (16.84 m)	14x25 66' 3" (20.19 m)	15x20 56' 6" (17.22 m)	15x23 63' 7" (19.38 m)	15x26 67' 5" (20.55 m)	15x31 78' 4" (23.88 m)	16x26 71' 2" (21.69 m)	16x32 82' 2" (25.06 m)	18x33 86' (26.21 m)	18x38 97' (29.56 m)	18x44 54' (x 2) (16.46 m x 2)	

9

SAND BASE & SAND COVE

You can now spread 2" (5 cm) of compaction sand, which is already inside the pool perimeter. Also, build a 4" cove, not needed if prefab cove used 4" (10 cm) thick around the inside base of the wall. Compact the center with a tampering tool or vibrating plate and the cove by hand. The cove will protect the liner from the sharp edges of the bottom wall tracks.

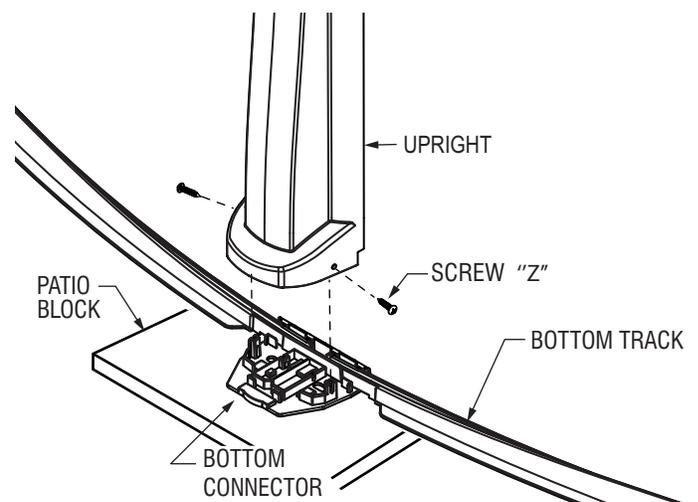

Level compaction sand one last time. Make sure that any sharp stones, debris or roots have been removed from the surface. For better protection, spray sand with water and pack it once more until the base is smooth, even and levelled.

10

UPRIGHT INSTALLATION (ROUND SECTION)

Assemble the upright to the bottom connector using the 1 screw "Z" on each side.

11

VINYL LINER INSTALLATION

See the liner manufacturer's instruction

12

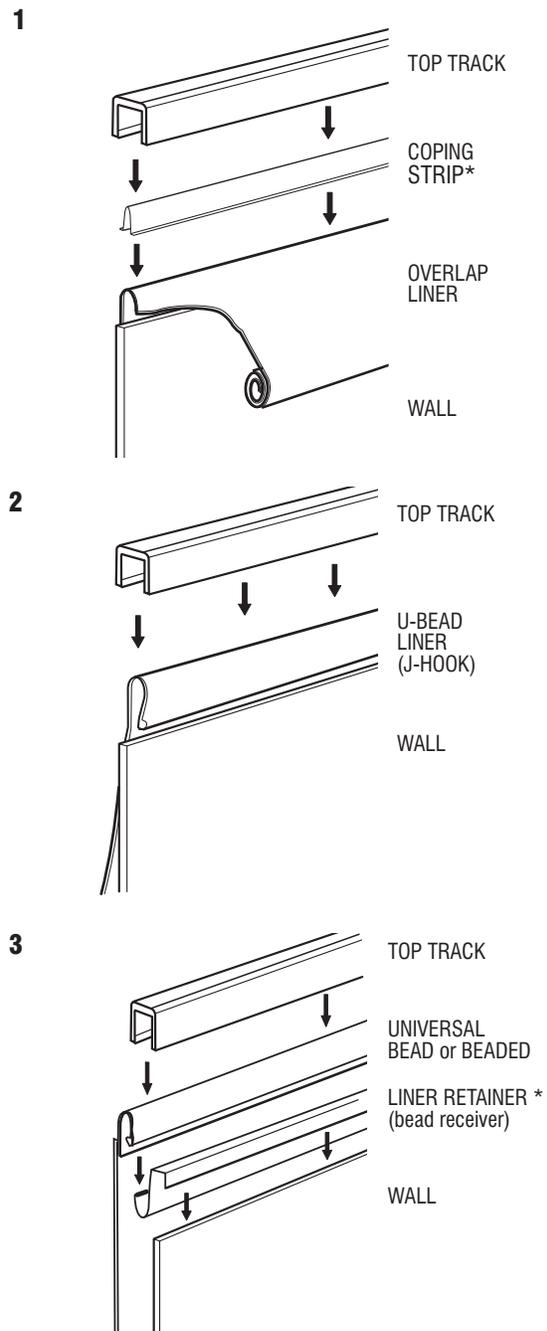

TOP TRACK INSTALLATION (3 OPTIONS)

This is to complement liner manufacturer's instructions. If you have any questions, please refer to the liner manufacturer's instructions, first.

1- Overlap liner : Install the coping strip* around the perimeter of the pool, then the top track on the wall, followed by the top plate on each upright. As the pool is filling, adjust the length of the liner on the wall by removing one top track at a time. Never remove more than one top track at a time.

2- U-Bead (J-Hook) (installed directly on the wall) : Hang the liner bead on the top of the wall and install the top track to secure it followed by the top plate on each upright.

3- Using liner retainer : Install the liner retainer on the top of the wall around the perimeter of the pool and then hang the liner bead in the lower part of the liner retainer around the whole pool. Install the top track to secure followed by the top plate on each upright.

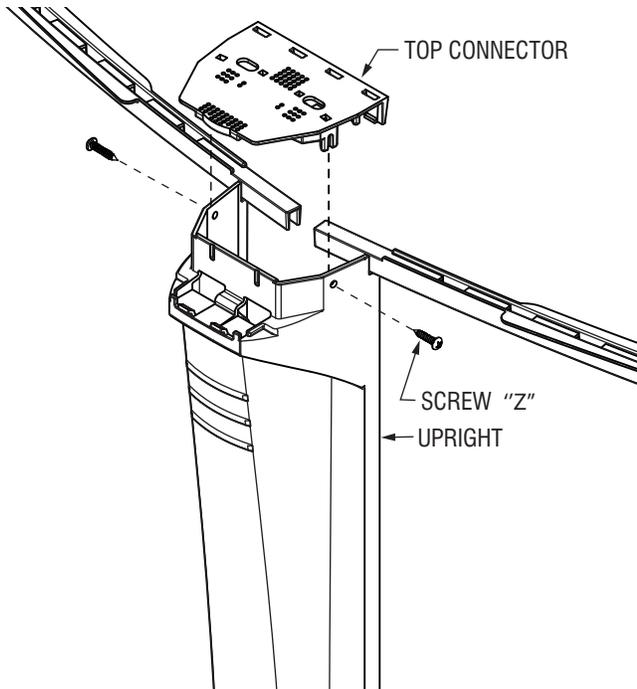

* Required but not included with all kits.

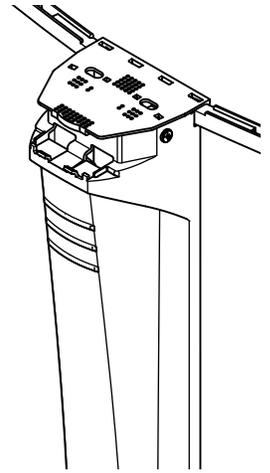

13

TOP CONNECTOR INSTALLATION

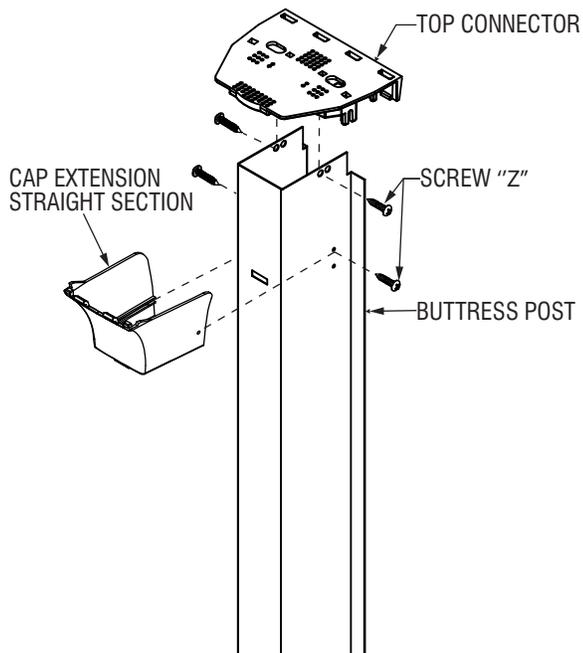

ROUND SECTIONS

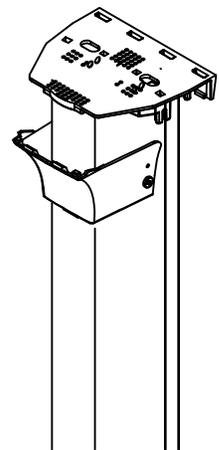

Install the top connector into the upright and secure with 1 screw "Z" on each side.

STRAIGHT SECTIONS

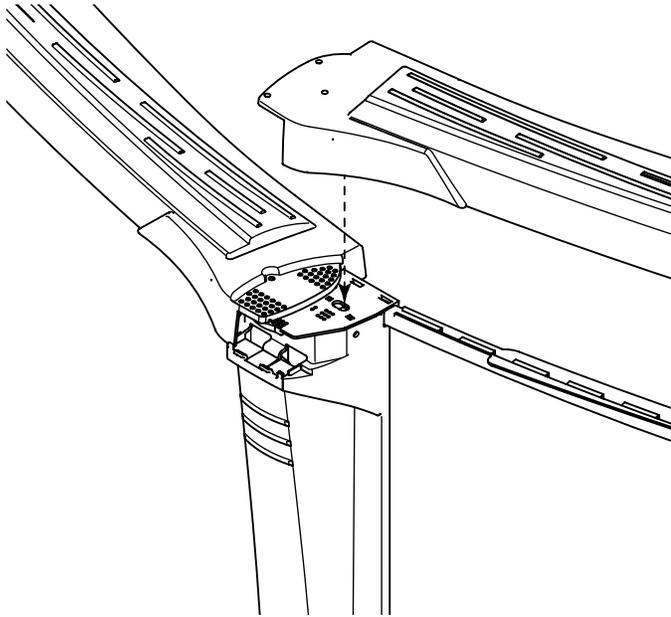

Install the top connector into the uprights and secure with 1 screw "Z" on each side. Install the cap extension into the buttress post with 1 screw "Z" on each side.

14

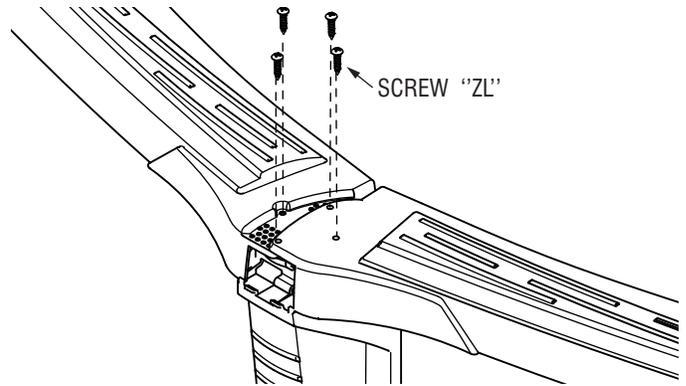

LEDGE INSTALLATION

Verify that each upright and butress post are completely plumbed.

Evenly distribute ledges all around the pool before securing them. Make sure the correct size ledges are utilized in the round and oval sections.

Secure ledges in place with 4 screws "ZL" per illustration.

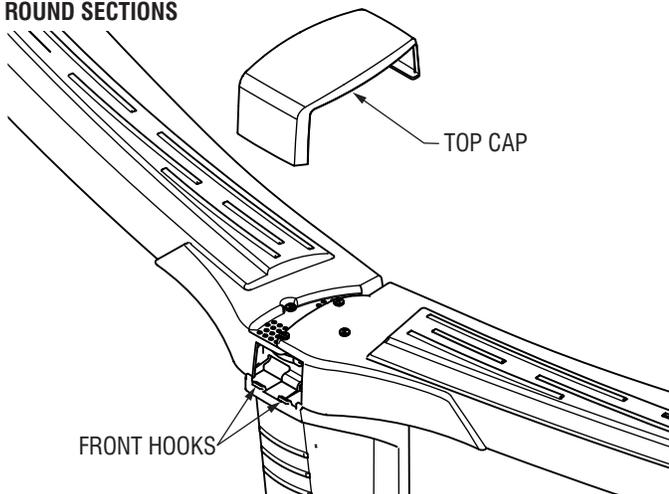

15

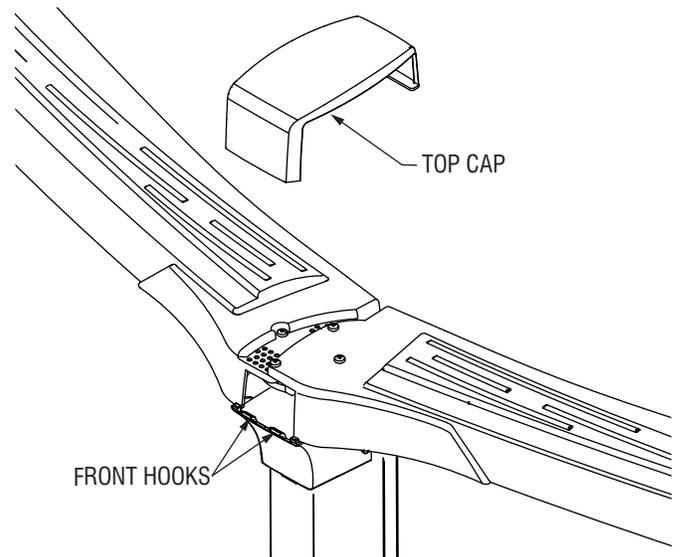

TOP CAP INSTALLATION

Insert front hooks first and then snap the top cap towards the inside of the pool.

SAFETY

Before filling the pool with water, make sure to install all safety labels. Refer to the following pages.

SAFETY INFORMATION

DO NOT DIVE OR JUMP, SHALLOW WATER!

WARNING : THIS POOL IS NOT DESIGNED FOR DIVING AND/OR JUMPING.

WARNING : The pool owner is responsible to ensure everyone who accesses the yard, follows all safety instructions.

WARNING : Be sure you have read and understand the 'Safety Information' sheets before you begin your pool installation.

- Never dive, jump or slide into an above ground swimming pool. Diving, jumping or sliding may result in permanent injury or death.
- The homeowner is responsible to install all safety labels. The safety labels shall be placed above the water line, never covered and always visible from any potential entry points of the pool. Also, make sure to install safety labels at all access points of your yard.
- Adult supervision is always necessary. Never take your eyes off children or swimmers in the water or near the pool.
- Designate an adult pool watcher. Make sure that you or your pool watcher are able to intervene in less than 10 seconds to save a life or avoid injury.
- Do not swim during thunder, electrical or wind storms.
- Keep rescue equipment such as life rings and reaching poles etc, in a prominent area by the pool at all times. Please consult your municipality to get a rescue equipment list.
- An emergency phone number such as: nearest available police, fire, ambulance and/or rescue unit, must be visible from pool area. A functioning fixed or cellular phone must be reachable immediately.
- It is important that all users be able to see the bottom of the pool. Foggy water must be cleared up before entering the pool. At night, sufficient lighting must be available. It's the homeowner's sole responsibility to provide adequate lighting for pool bottom, safety labels and walkways, which exceeds minimum standards of the IES of North America.
- Never swim alone, under the influence of drugs or alcohol, tired or ill.
- All accessories and liners : the homeowner must follow the manufacturer's instructions and safety warnings.
- Do not affix any other products to your pool other than required by your local code.
- Do not sit, climb or stand on the top ledges of the pool.

WARNING : this product contains chemicals which are known to the state of California to cause cancer and/or reproductive harm. p65warnings.ca.gov

SAFETY LABELS

If you require additional labels, you can order more free of charge by calling 1-888-777-0447

SAFETY INFORMATION

WARNING : All pool components, such as the filtration system, pump and heater should not be positioned in such a way that someone could use them to gain access to the pool. Be sure that filter, pump, all toys, chairs, tables, buildings or similar objects are at least at a minimum of 4' (1,22 m) away from the pool. Positioning such objects too close to the pool may allow access to the water while unattended and may cause serious injury or death.

Congratulations! You have purchased a pool of superior quality and durability. To achieve the best possible results, follow the instructions carefully. Failure to follow the installation procedures may result in damage to your pool or property and void your warranty. We recommend that you make a preliminary study of the instruction booklet to familiarize yourself with the different parts of your pool. Make sure that you understand each step thoroughly before you begin assembling. We recommend having your pool installed by a professional. We wish you a most pleasant and refreshing summer.

The homeowner must supervise the installation of the pool in order to make sure that proper installation methods are followed.

The pool is subject to wear and deterioration if not maintained properly and could lead to failure of the pool's structure. Failure of the pool structure might release large quantities of water that will cause property damage, bodily harm or even death.

Before installing your pool, you should check local regulations such as building codes, zoning requirements and electrical codes.

Refrain from finishing up your pool with stones, rocks, gravel, etc., to avoid chipping of the paint and damaging the pool wall. Most decorative rocks are very acidic and they can damage and/or corrode your pool wall beyond repair.

We are not responsible for the installation of the pool. We are not affiliated with any pool installer and assume no responsibility or liability linked to a faulty installation of the pool.

Warning : Do not modify any components of the pool without the written authorization of the manufacturer. Doing so will void the warranty.

If you need any parts, you can order these by calling 1-888-777-0447 or at www.corneliuspools.com
