For over 60 years, we've been perfecting the art of pool production. You and your family deserve nothing less. Installing an inground pool is a very big investment, and we are committed to give you the best materials, the finest craftsmanship, and the most beautiful designs you'll ever find.

Royal Pools are built with panels constructed of the highest quality, 14 gauge, G-235 zinc-coated, galvanized steel available. The strength of steel remains unrivaled whether building pools, bridges or skyscrapers. That's why these pools are constructed using heavy gauge steel covered with twice as much protective zinc coating as commercial grades. Our steel panels are built to withstand extreme conditions, and fortified with pioneering Armor Guard, an additional layer of protection designed to prevent corrosion and extend the life of your panels.

The 5" top & bottom flanges feature a unique "double bend" which further strengthens the steel panel. In addition, the full box beam wall stiffeners and side flanges are firmly secured by an unparalleled bolt inter-loc system. Reinforced by a heavy gauge adjustable A-frame brace, these pools are built to last a lifetime – **guaranteed!**
